

Homeowner Association Management System

This document defines the requirements and the user experience for a homeowner association (HOA) management system.

[Introduction](#)

[Use Cases](#)

[Requirements](#)

[Mockups \(screens\)](#)

[Data Model](#)

Introduction

Problem

Communication between tenants and the homeowner association committee can be cumbersome.

- Tenants frequently miss messages that the committee wants to communicate.
- There is no structured tracking for issues reported by tenants.
- Voting on decisions require physical presence which causes a low vote rate.
- Tenants often complain that they want more transparency on the expenses and how the money is being used.

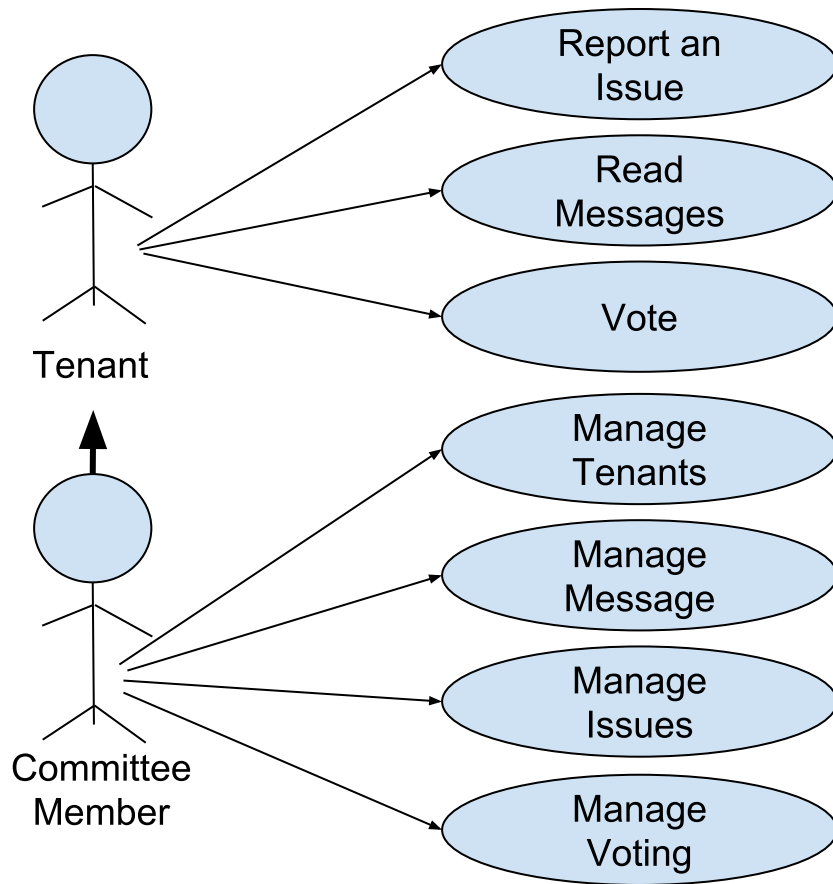

Solution

An online web application for homeowner committee and tenants.

Target Audience

- Committee member. Each building/condominium has a homeowner association which has a committee. Member of the committee will open the account and manage the tenants. A committee member might also be a tenant.
- Tenant. A tenant in a building/condominium that has a homeowner association.

Use Cases

Requirements

User Management

- As a committee member I want to sign up to the web application and create an account to my building/condominium (name, email, password, building community name, full address).
- As a committee member I want to add tenants to the account (name, email and apt number).
- As a committee member I want to view tenants.
 - Filter with free text that will apply name, email and apt.
- As a committee member I want to remove tenants from the account.

Voting Management

- As a committee member I want to create a new voting
 - Set a short description/question for the voting.
 - Set a long description with more details on the voting.
 - Set options to vote on (array of strings).
 - Set an end date for the voting.
- As a committee member I want to end a voting and publish the results.
- As a committee member I want to view the voting percentage of each voting.
- As a tenant I want to view active votes and vote on them.
- As a tenant I want to view the results of votes that ended.

Message Management

- As a committee member I want to post a new message.
 - Set a title for the message.
 - Set details (long text) for the message.
 - Set priority to message (Important, Info). Default is "Info".
 - Upload an image. Optional.
- As a committee member I want to delete a posted message.
- As a committee member I want to update a posted message.
- As a tenant I want to view all messages sorted by date.
- As a tenant I want to filter messages by priority.
- As a tenant I want to search message by text in the short or long description.
- As a tenant I want to comment (or reply on a comment) of a message.

Issue Management

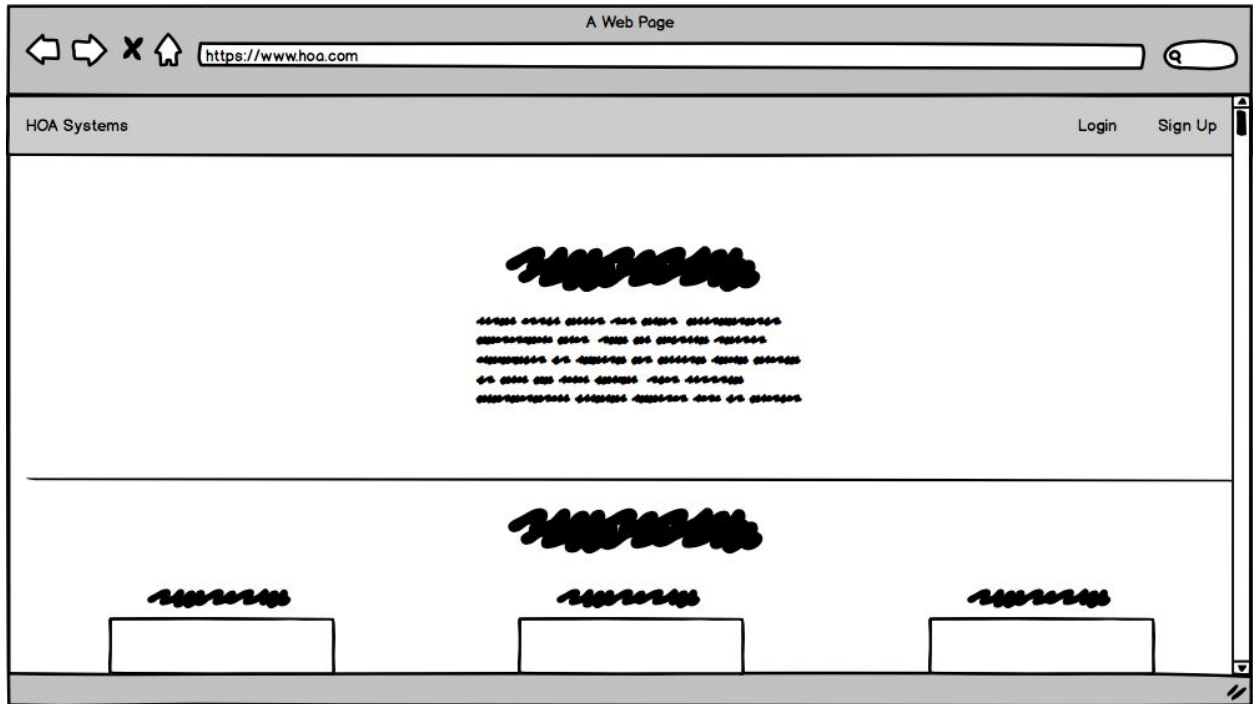

- As a tenant I want to report a new issue.
 - Set a title for the issue. Mandatory.
 - Set details for the issue. Mandatory.
 - Set priority for the issue (urgent, important, normal). Default is normal. Mandatory.
 - Upload an image. Optional.
- As a tenant I want to delete an issue that I created.
- As a tenant I want to update an issue that I created.
- As a tenant I want to close (change status) an issue that I created.
- As a tenant I want to view a list of all
- As a committee member I want to view all issues sorted by
 - Date. Default.
 - Priority.
- As a committee member I want to comment

Misc.

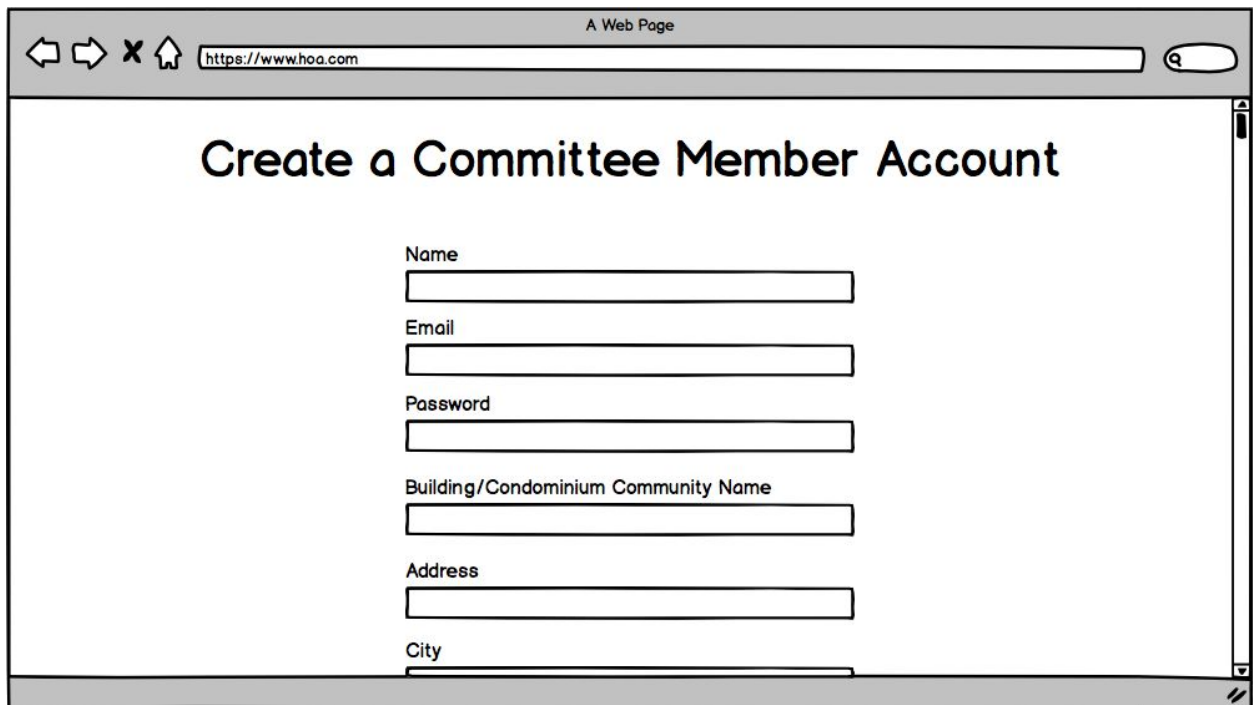

- As a committee member I want to have a dashboard that shows the following information:
 - New/Unread reported issues.
 - Issues that are open for over a week.
 - Voting percentage for current open votings.
- As a tenant I want to have a dashboard that shows me the following information:
 - New/Unread messages.
 - Open votings that I didn't vote on.
 - Ended votes that I didn't see their result yet.
 - New/Unread issues reported.
 - New resolved issues.
